Dairy Products Imported to Russia

Russia has announced new requirements for the import of dairy products. These requirements include extensive public health statements that cannot be made under the U.S. Department of Agriculture (USDA), Animal and Plant Health Inspection Service (APHIS) authority. Currently, the USDA cannot issue certificates meeting these requirements. APHIS is seeking a solution with Agriculture Marketing Service and the Food and Drug Administration, the competent authority for issuing public health certificates.

In the meantime, APHIS believes that Russia is accepting dairy products on the following certificate. However, because this certificate does not technically meet the Russian import requirements, exporters must have their importers confirm prior to shipping that the certificate is acceptable for their shipment. APHIS cannot issue any other certifications for dairy products exported to Russia.

Prior to the endorsement of the following certificate:

- The signatory must cross out and initial the statement about the BSE status of the US
- The exporter must be able to verify that the materials only come from States free of Vesicular Stomatitis Virus (VSV).

Health Certificate No. _____ (Valid Only if the USDA Veterinary Seal Appears Over the Certification #)

VETERINARY CERTIFICATE FOR NON-FAT DRY MILK, DERIVED FROM THE CATTLE, EXPORTED INTO THE RUSSIAN FEDERATION

Exporting country: The United States (USA)	
Competent authority: Ministry of Agriculture	
Establishment issuing this certificate:	
Administrative-territorial unit:	-
1. Identification of products:	
Name of products	
Number of packages	
Net weight	
Name (No.) And address of the establishment, approved by the Government	•
2. Kind of package	_
3. Identification marks	-
4. Conditions of storing and transportation (temperature, etc.)	

	Health Certificate No(Valid Only if the USDA Veterinar
	Seal Appears Over the Certification #
nformation about destination:	
Countries of transit	
Point into Russia	
Name and address of consignee	
Means of transport
